FOR IMMEDIATE RELEASE

EBM TECHNOLOGIE BEGINS DISTRIBUTION OF PACS PRODUCTS IN EUROPE

EBM technologies begins sales of its radiology PACS products in Europe and is represented by EUport.

Taipei, June 14th, EBM Technologies, Asia's largest PACS vendor, offers a complete range of PACS products to meet the needs of healthcare professionals; from enterprise image management solutions to smaller projects including workstation, backup, and recovery technology. The software can be customized to meet individual needs and requirements. EBM technologies is represented in Europe by Euport from the Netherlands. Euport will help EBM Technologies in establishing a European distribution network by working together with local distributors.

EBM has an installed base of over 5,500 licenses of UniSight (diagnostic and reviewing stations), 600 licenses of UniWeb (online PACS), 500 licenses of UniServer (storage & utility server), operated by more than 500 hospitals and imaging centers worldwide. EBM employs a large research and development team to ensure full HL7 integration and compliance with DICOM, HIPAA and IHE.

Local European distributors or resellers are invited to join the sales network of EBM Technologies.
